Presidency University

Expected Graduation: 2027

Bachelor of Computer Applications (BCA) — Data Science

Bengaluru, India

TECHNICAL SKILLS

Languages:	Python, JavaScript, HTML, CSS
Frontend:	React.js, Tailwind CSS, Bootstrap, Responsive Web Design
Backend:	FastAPI, REST API Integration
AI & Data Science:	Retrieval-Augmented Generation (RAG), FAISS, Sentence Transformers
Tools & Platforms:	Git, GitHub, VS Code, Google Antigravity, Vite, Vercel

PROJECTS

RAG-Based Intelligent Academic Information Assistant

Status: In Progress

Role: Group Leader (RAG & FastAPI Backend Integration)

- Developed an academic reference assistant helping university students retrieve relevant academic document information.
- Implemented document parsing, vector embeddings, and similarity search using FAISS and Sentence Transformers.
- Built FastAPI backend services with structured query endpoints for contextual question answering.

VeriSync — Secure Assessment Portal

Status: In Progress

Role: Developer B (Admin-Web Application)

- Engineered the admin-web application for an online internship assessment portal built for Destiny Communication.
- Implemented user interfaces with React.js and Tailwind CSS integrated with backend REST APIs.

INPM Trust Website

Status: Completed

Role: Website Development and Design

- Designed and developed a responsive organization website presenting activities, trustees, causes, and support information.
- Built with React.js, modern responsive design patterns, and clean semantic markup.
